

PRODUCT INFORMATION CONVEYOR BELT KH 500

KRAMPEHAREX® KH 500

The KrampeHarex® Conveyor Belt KH 500 is a powerful dosing unit for problem-free mixing of steel fibres.

Due to a continuous fibre output flow, dosage surges which cause the formation of steel fibre balls are avoided.

It is possible to dose difficult fibre geometries.

Due to the inbuilt tires, the conveyor belt is easily moveable and suitable for ready mixed concrete plants or on construction sites.

PRODUCT INFORMATION

- Dosing capacity up to 50 kg/min
- Connection to alternating current 240 V / 50 Hz
- Weight: 500 kg
- Dimension (transport state)
Length = 6,50 m / Width = 1,38 m
